Epicor iScala solutions for the Hospitality industry

Ingredients

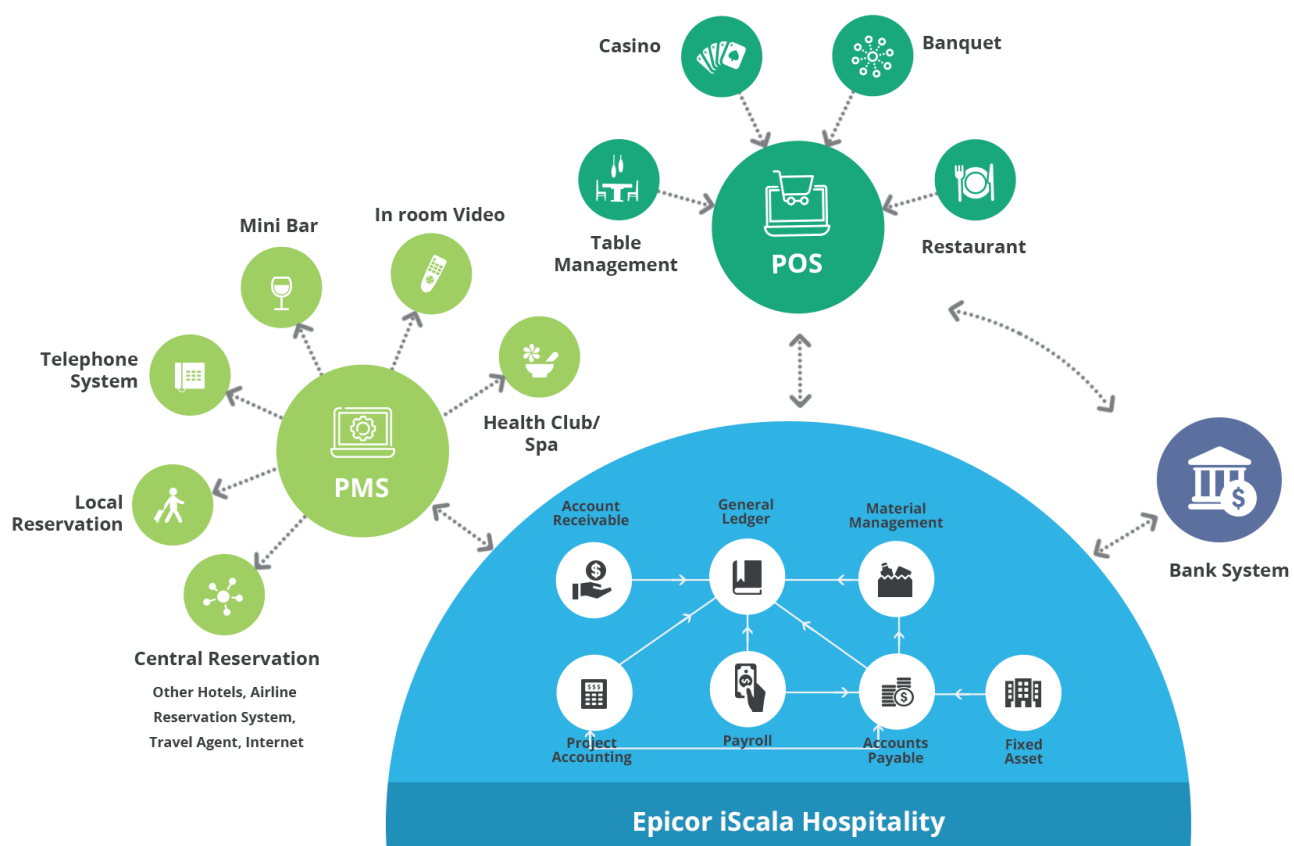

RheinBrücke Epicor iScala Hospitality solutions

The hospitality industry faces intense competition. Travel and tourism continues to grow and innovate every year. Hotel chains are trying to capture newer markets and independent hotels endeavor to keep pace with the big names. Traveler's expectations are growing as they look for the best experience at the best price.

Hotels can maintain their competitive edge by acing their marketing efforts. In today's hospitality landscape, hotels want to know as much about their guests as they can so they can better customize an experience through amenities and services. By utilizing digital technology and social media platforms, hotels are now able to reach their potential guests and create a more personalized experience.

We at RheinBrücke are aware of the challenges that the hospitality industry faces. RheinBrücke Epicor iScala solution for Hospitality can handle all this by delivering a globally innovative solution that can streamline your operations. Epicor iScala delivers the simplest and fastest way to provide a fully functional integrated back-office solution that helps drive efficiency and cost saving across all key focus areas of the business.

It is designed to meet unique hospitality requirements for a single location hotel or multi-site operation with mixed shared service centres and local facilities dispersed around the globe. iScala for Hospitality is available on premise and as a hosted solution. The solution meets the needs of hotels and resorts by simplifying cost management, streamlining key activities,

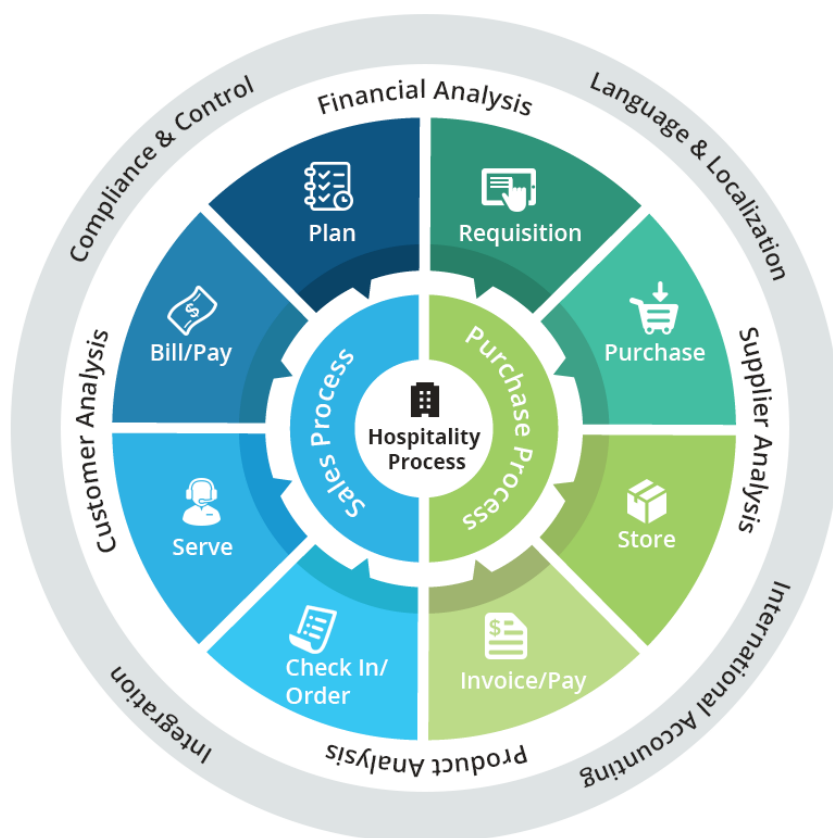

- Streamline and standardize back-office processes
- Manage costs and drive bottom line profits
- Capture and manage key finance information
- Simplify operations and reduce overheads
- Integrate front and back office systems
- Analyse financial reports in real-time
- Eliminate duplicate processes
- Operate in nearly paperless environments

RheinBrücke Hospitality Template

RheinBrücke has taken hospitality best practice processes from our experience of earlier ERP implementations, and built them into a readymade solution. The template is a pre-configured business solution designed by RheinBrücke to help you extract more value from your ERP implementation.

As the needs of every hotel is specific, we mould our solution to the specific needs of your business with our hospitality template. Our holistic template includes all the capabilities to manage the hospitality process, be it a smaller chain, group of global chains or an independent hotel.

Our template accelerates your business by improving security and control, lowering the cost of ownership, faster deployments, being locally compliant with worldwide availability that gives a fast return on investment.

Integrated Solution

Efficient handling of cash and the integration of ERP and Point of Sale (POS) systems can make the difference between profit and loss. Epicor iScala uses Service Connect to integrate with Property Management Systems (PMS) and POS. Epicor iScala Hospitality's PMS interface provides the integration needed to directly capture data from the front desk and other integrated systems (e.g. mini-bar and telephone usage). Double entry of data is no longer required, reducing cost and the risk of human error while increasing accuracy and the speed of information. Epicor iScala Hospitality has a flexible integration to POS systems that can support most POS solutions including Micros, InfoGenesis and Maxial which help maintain most complex of details such as changes to recipes or even the actual consumption trends, which can be updated into Epicor iScala Hospitality's Material Management module.

RheinBrücke Extended Enterprise Solutions for Hospitality

Financial

Epicor iScala delivers financial capabilities that you can easily tailor to your specific business. The iScala solution provides a fully integrated set of Sales, purchase, and general ledgers. These ledgers are the key components in building a real-time enterprise—providing an integrated transaction management system that systematically ensures the integrity of all data flowing into the prime accounting ledgers. iScala can be easily integrated to your bank to support advanced bank reconciliations. **iScala for Hospitality can easily be integrated to your bank to support advanced bank reconciliations. iScala financial management also helps with reporting and analytics such as customer analytics, supplier analytics, product analytics and daily analytics.**

Supply Chain Management

With Epicor iScala you can streamline the entire process from requisitioning through purchasing and receiving, to payment— saving you time and maximizing internal efficiency. Integrated approval processes are designed so that only approved staff can release requisitions, and only assigned staff who know where items can best be sourced are allowed to modify the fulfilment. This helps to keep costs low without sacrificing speed, customer service, or quality. With the ability to maintain and track budgets by department you can control expenditure at the point of requisition. The iScala solution supports the entire materials management lifecycle and helps to quickly identify delivery or invoicing errors and record all material movements orders and invoices received.

Human Capital Management

Epicor iScala can be integrated with Epicor HCM. An integrated HCM solution helps hotels to manage a diverse workforce. The ability to track multiple shifts and jobs becomes easy. Gives a centralised application that can be accessed 24/7. Right from recruiting and hiring to on boarding, Epicor HCM helps hotels to efficiently manage the entire lifecycle of their employees. Leveraging iScala payroll, the HR personnel of the hospitality industry can easily process payroll, generate reports and execute changes on the go which simplifies and automates the entire process, improving efficiency of the HR department.

Maintenance Management

The Maintenance Management module of EPICOR iScala allows users to schedule preventive maintenance on equipment based on measurable quantities and counters such as equipment production hours, vehicle mileage or number of copies.

It also has a built in Help Desk functionality so users can identify issues and call for corrective action using order, monitor and escalation routines that are integrated with Microsoft outlook and also use the tool to automatically recognize activities covered by contract/warranty. This can increase the lifetime of assets, reduce downtime and ultimately reduce costs.

Epicor iScala Maintenance Management provides new opportunities to control service activities including full control over and allocation of material and resources (external as well as internal).
