EPIC Process

Process Manufacturing Template Solution on EPICOR ERP

Introduction

Manufacturing Industry is evolving at a rapid pace with numerous emerging trends like IoT and Machine Learning offering plenty of opportunities to manufacturers to improve their efficiency. Modern manufacturers understand the need to embrace these digital technologies to be more agile and responsive.

Manufacturers today need to look for solutions that are best suited for their processes that can help improve their efficiency and profitability. The software requirements for process manufacturers, who work with ingredients instead of parts, and the production process more focused on recipes and formulas than traditional bills of materials, are very unique. Process manufacturing becomes more complicated as raw materials and ingredients, many times with limited shelf-life need to be blended or mixed in a batch utilizing recipes and formulas, allotted in varying units of measure.

Key Challenges in the Process Manufacturing Industry

Recipe/Formulae Management

Quality Control & Statistical Process Control

Potency Management

Product Compliance

Batch Order Maintenance

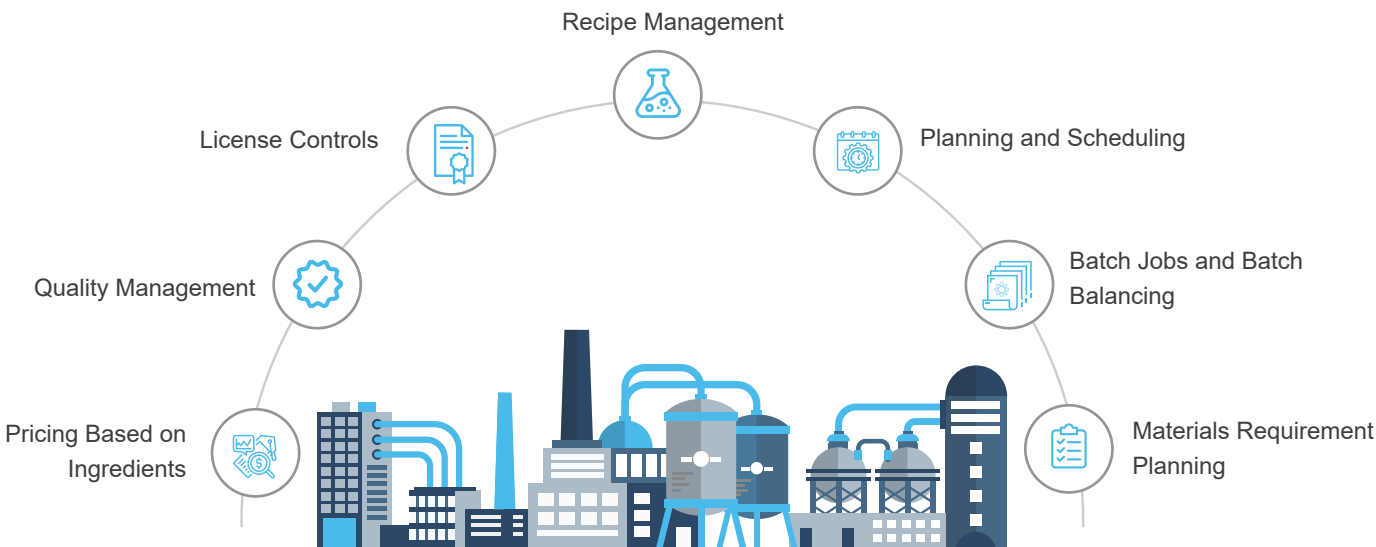

Lot/Batch Control

An Integrated ERP solution that provide the visibility through the manufacturing chain – starting from suppliers, along the production process and up to customers can help process manufacturers continually adapt their production practices. It enables you to get better control of your manufacturing processes like batch processing, formula changes, stringent quality processes, etc and meet traceability and other compliance demands while minimizing waste and inefficiency as well as delays in time to market.

EPICProcess

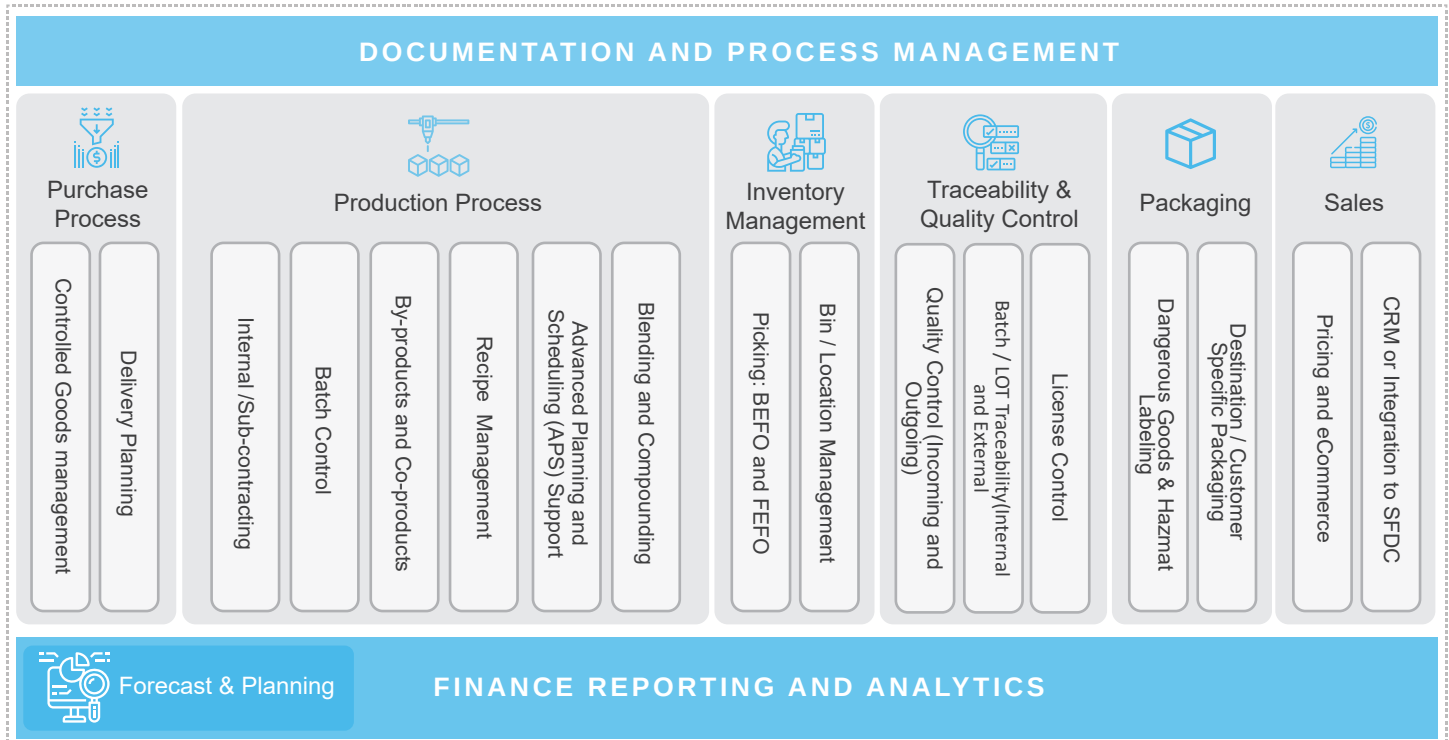

EPICProcess from RheinBrücke is the ready to deploy industry vertical Process Manufacturing template solution for Epicor ERP. It is a full feature ERP template purpose built for recipe-based process manufacturing with comprehensive solutions that addresses your business needs. EPICProcess supports many diverse processes and mixed-mode manufacturing industries including Chemical, Pharma, Food and Beverage, Paints and Coating and more. The solution combines the powerful features of Epicor ERP and RheinBrücke's deep process manufacturing industry knowledge.

Key Features of EPICProcess

EPICProcess - More than a Generic Manufacturing ERP

EPICProcess has robust functionalities to fit the unique requirements of the Process Manufacturing Industry for Blending & Compounding processes from the laboratory to the production floor including specific functionalities for recipe management, variable production output and traceability besides other mission critical business processes such as finance reporting and analytics, planning, supply chain, sales, etc.

Features for Process Manufacturers

Pricing and Packaging

- Dynamic pricing based on ingredients
- Dynamic sales prices based on ingredients
- Ability to containerize the bulk products in various package sizes with labels
- Destination/Customer specific product packaging

Recipe Management

- Recipes/Ingredient types
- Co-products and By-products
- Revision Management, Active Ingredients
- Dynamic item attributes, define item attributes as potency items
- Adjustment of raw materials based on potency variations on planned lots
- Record the actual concentration of potency items
- Formulas can be configured to utilize potency ingredients
- Formulae definitions with versions, approvals and audit trails

Quality Management

- Ability to do attribute-based inspection for raw materials, work in process and finished items
- Prepare Test Certificate of Analysis from test results
- Lot Inheritance capabilities
- Quality Orders/Quality Status
- Positive Release

Scheduling, Batch Jobs and Batch Balancing

- Blending Workbench, Batch Allocation and Batch Order Costing
- Reserve batches of active ingredients using batch balancing on production formulas
- Define Co-Products Batch Order
- Define sample plan and attach to products definition
- Ability to modify the recipe in Batch Orders with approvals and tracking
- Costing of Co-products and By-products

License Control

- Define approved vendors and control the procurement from approved vendors
- License control for suppliers, customers and locations
- Define Customer Sellable Days
- Define Country Sellable Days
- Same batch reservation

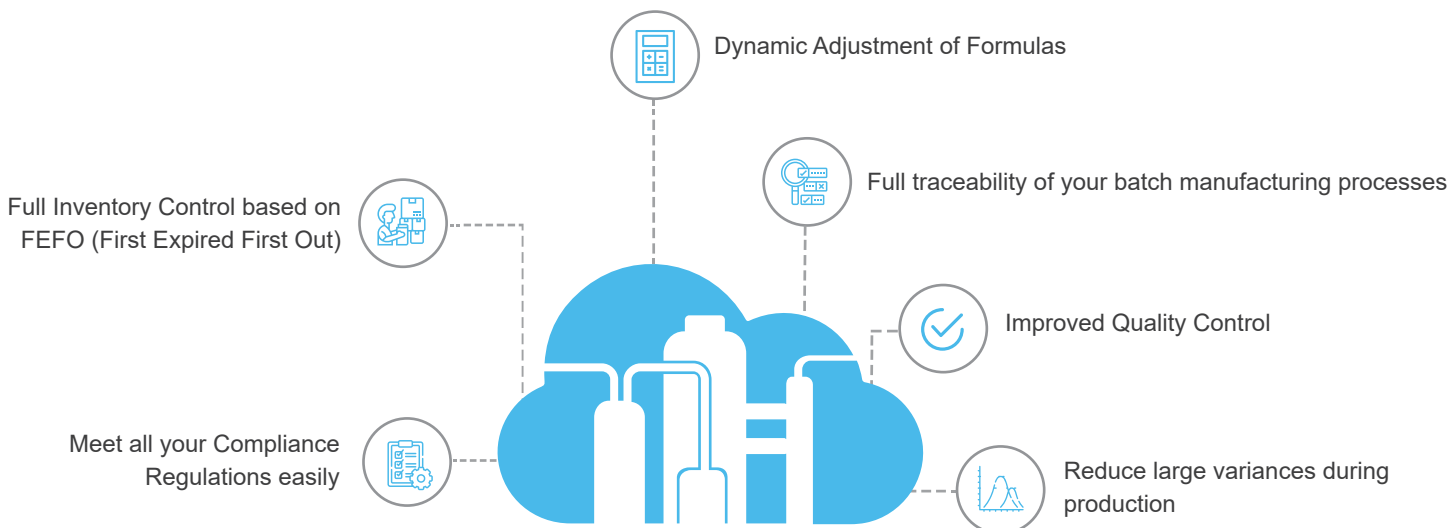

Material Requirements Planning/Inventory Management

- Define Shelf Life, Manufacturing and Expiry Date for batches
- Controlled lot release and batch tracking
- Ability to control issue of batches in First Expire First Out (FEFO) order

EPICProcess – An ERP Solution built for Process Manufacturers

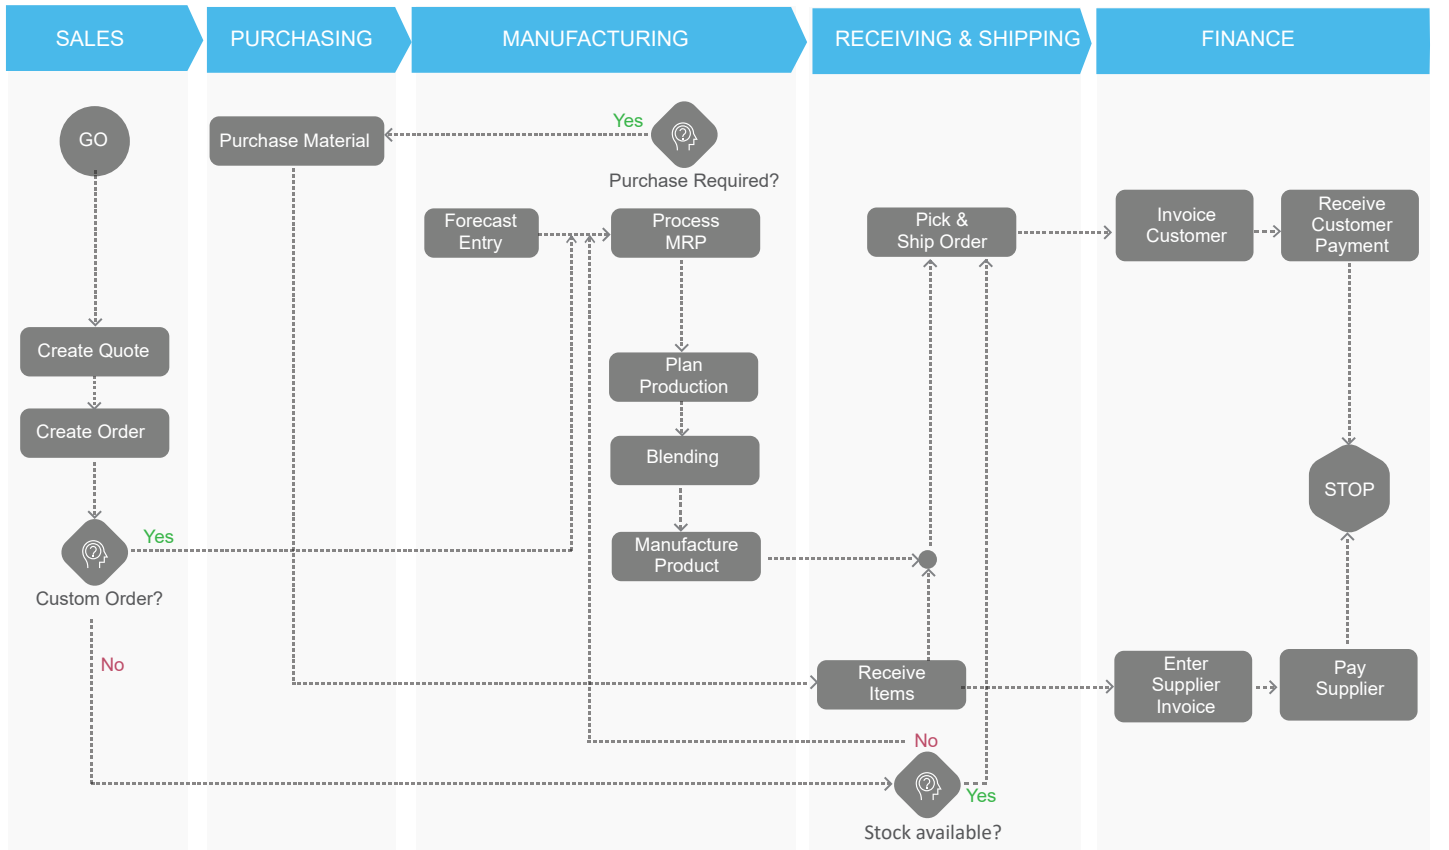

The pre-configured solution helps process manufacturers implement the latest Enterprise Management solutions tailored for their business needs, faster and at the lowest total cost of ownership, ensuring a faster time to value. It has all the functionalities required to handle the various stages of process manufacturing which involve complex recipes that may require managing recycling, by-products, co-products and waste.

Business Benefits of EPICProcess

The solution's template is developed by RheinBrücke's experts based on proven best practices aggregated from our multiple industry implementations across the world and can be adapted quickly to meet the specific needs of your business to ensure more value from your ERP implementation.

Process: Quote to Cash Flow Change in Manufacturing

The RheinBrücke Advantages

Flexible Deployment Options

The solution offers you the flexibility of deployment on-premise, hosted or as a cloud-based SaaS based on organization requirements with similar capabilities and features for all deployment options. This allows customers to leverage all the features, flexibility and customization capabilities offered by the system irrespective of the deployment option.

RAPID Implementation using SCALE Methodology

RheinBrücke's standardized SCALE methodology driven by industry best practices ensures a successful ERP implementation in a short time span by minimizing risk and maximizing predictability with clearly defined deliverables and processes. It is a scalable approach for implementation that is designed to address your needs based on the foundation elements – Solutioning, Consulting Expertise, Agile Practices, Learning and Enablement.

RheinBrücke Academy

We offer a comprehensive web-based Learning Management platform, RheinBrücke Academy to ensure effective training of end users as well as key users and administrators. Our Academy offers interactive & engaging simulation-based educational resources ensuring 100% module coverage for all your users and allowing them to use the solution to its fullest potential. Courses are organized based on categories, roles and expertise. This allows you to manage change effectively and you can also ensure that your teams are certified on RheinBrücke Academy.

Support

RheinBrücke's Omnichannel Support driven by a robust ticketing system ensures that your business users have the support and help available from our large pool of Epicor Certified professional engineers who have worked on multiple complex global ERP implementations.

Case Study

Implementation of Epicor ERP for a leading manufacturer and supplier of high quality flexible packaging products streamlines their process and enables seamless order processing

Key Business Challenges

- Complicated quoting process for customized end products
- Customized production to be fine-tuned for each customer
- Lack of automated and streamlined inventory management with lots merging with each other, automatic consumption of lots, and serial tracking of items based on FIFO
- Stimulating the manufacturing processes and quality standardization

Business Impact

- Process of quotation integrated with ERP
- Production process fine-tuned with easy traceability options
- Seamless processing from order to QC and invoicing, with job costing to prevent cost overruns
- Material and production planning are improved and standardized

RheinBrücke's Solution

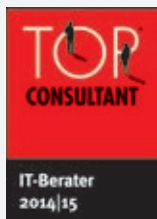

Implemented EPICProcess solution using RheinBrücke's highly standardized SCALE methodology and industry specific template that is designed to accelerate the client's growth by supporting all their key processes.

- Parameterized quoting process with wastage calculation
- Introduction of lot number tracking in inventory/production process for easy tracking
- Introduction of log sheet capturing for complex production processes and ensuring traceability at each level of the production process
- Integrated the automatic curing process
- Automated tailor-made solution for the complex manufacturing process
