EPICOR
Platinum Partner

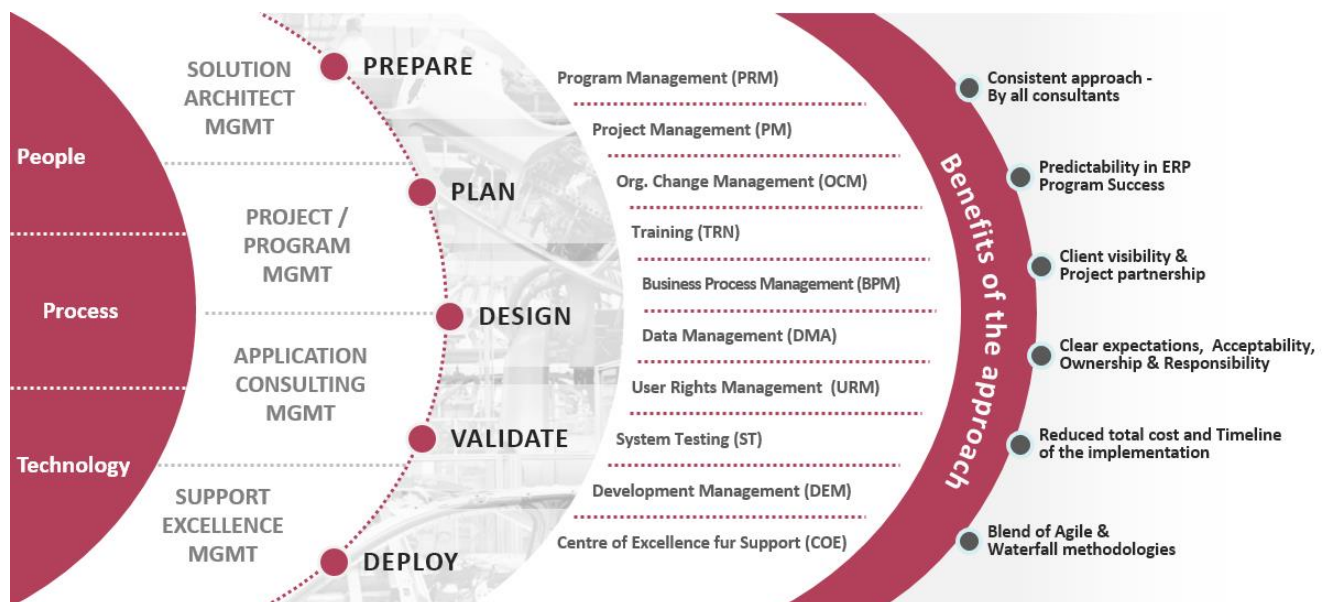

RheinBrücke 4-Pillar framework leveraging e-Fusion methodology

Using our 4-Pillar approach and our expertise in Epicor implementation services, we mould Epicor ERP to fit your business needs. We build referenceable and happy customers by delivering high performance and best in class Epicor services.

e-Fusion methodology - Execution Approach and Stages

As per to our redefined methodology an Epicor business transformation life cycle can be divided into 5 stages and 10 activity deliverables as represented below. All these activities fall under our guiding principle, the 4-Pillar architecture

Case Studies

Oilfield Service Company Builds a New Operating Model Enabled by a Digital Oilfield

About

Name: : Our customer is an independent oilfield service company founded with the purpose of providing world class services to clients operating across the Middle East and North Africa

Headquarters: Dubai, UAE

Industry: Oil & Gas EPCIC (Pipelines & Facilities)

Business Challenges

- **No Real-Time Access:** Lack of connectivity due to remote locations. Field engineers unable to resolve service requests due to lack of information such as availability of inventory at rig locations.
- **No integration with Asset, Inventory and financial modules:** Technicians unable to create service ticket without information on latest prices of products, day time charges and service job charges.
- **Higher Outstanding Payment:** Manual invoicing process. Field engineers have to return to office to process invoice. The time to receive payment is longer as the payment term does not begin until the invoice is created.

RheinBrücke Solution

RheinBrücke Oil and Gas Mobility Solution:

- Materials Management Suite supports quality control, Lot control, and expiry date tracking.
- Document Management Suite enables submission of digitally signed tickets by customer electronically on-site.
- AFE Control & Centralized Asset Management Suite has budgeting & approval capability including AFE

Field Ticketing Automation Solution:

- Integration with other Epicor modules enables creation of Service Ticket on-site with latest updated information.
- Business Line Approval Workflows maintained in Epicor for tickets enable quick approvals for Invoices.

Business Impact

- Integration between Epicor ERP and Epicor Field Service Automation delivers a comprehensive solution across the full process life cycles providing a first-class service scheduling and mobility experience.
- Significantly improved data quality by 45 %
- Saved 450K US \$ by implementing real time dashboards on the mobile platform
- Improved optimization and scheduling of field resources and work thereby achieving greater field productivity by 25%
- Field personnel have more time to focus on operational tasks
- Recouped ROI within 9 months of implementation of the comprehensive suite of solutions including deployment of field mobility capabilities.

Customer Speak

"Thank you for the continued good work on the ERP and Supply Chain project. I appreciate how you leverage the teaming with cross cultural teams with low cost geography for developmental resources while not compromising on the quality of deliverables to business..."

Massimiliano A. Milani

Director Europe & Africa at Federal Mogul, Antwerp, Belgium

"RheinBrücke demonstrated great technical and functional depth of our industry and Epicor ERP system implementations. We are happy to have chosen RheinBrücke to automate our operations leveraging Epicor ERP enabling us to focus on more strategic initiatives"

Chris Gilbert

CEO, Gemaco Interiors, UAE

"We leveraged their services for past 12 months and from this experience, I can definitely say that they did a fantastic turnaround of the project. I enjoyed the open, transparent and efficient dealing with them and came to appreciate their work..."
